

Taking care of people, our masterpieces

Q-Plus EVO

Q-Switched Laser Platform Tailored to Your Needs

Q-SWITCHED LASER PLATFORM TAILORED TO YOUR NEEDS

Q-Plus EVO is based on a powerful Q-Switched laser technology that ensures a great versatility in clinical applications. Q-Plus EVO includes different Q-Switched lasers which interact photo-acoustically with the tissues, IPL and Pulsed Lasers that act in a Photo-Thermal way. These exclusive combinations make this system unique and capable of treating multi-color tattoos and benign pigmented lesions without using the inefficient and consumables dye handpieces really common in other systems. It is also used for permanent hair reduction, vascular lesion removal and treatments of aged pigmented skin.

THE Q-SWITCHED MODE

In Q-Switched mode, very short pulses (6ns) deliver very high peak power (hundreds of Mega Watts) enabling a highly efficient photo-acoustic effect and drastically reducing thermal interaction with tissue. As a result, the unwanted tattoos and natural pigments of the skin are fragmented in small particles that are removed through the process of phagocytosis.

HYBRID CONFIGURATION

FULL Q-SWITCH CONFIGURATION

Q-SWITCHED WITH PULSED LASERS

The pulsed additional modules effectively perform permanent hair reduction, vascular lesions removal and treatment of aged and pigmented skin. These modules are composed of Nd:YAG (1064/532 nm and optionally @1320 nm)/Alexandrite (755 nm).

The effects are based on the selective thermal damage of the skin targets such as melanin, blood and water.

The laser handpiece of the Pulsed modules can be integrated with either contact or air based skin cooling devices, allowing safe and comfortable treatments.

FLAT TOP OPTIBEAM II TECHNOLOGY

The laser beam profile must be as much homogeneous as possible, otherwise longer healing time and side effects can occur. The extremely high laser peak power of these devices (more than 160 MW) is delivered on the skin without any “hot points” in the spot size.

OPTIBEAM II® handpieces assure a flat top beam profile due to its advanced optical technology, able to distribute the laser power homogeneously all over the spot size. The OPTIBEAM II® has squared, rounded and fractionated beam profiles. These handpieces are all not convergent to maximize the delivery of energy in deep skin and to be used in safety also if the handpiece is not in perfect contact with the skin.

EVO CONFIGURATIONS

Q-PLUS A	Q-SWITCHED and PHOTO-THERMAL	Nd:YAG 1064/532 nm
Benign pigmented lesion removal - Tattoo removal - Lightening of unwanted hairs - Skin rejuvenation Dermatological foot conditions (skin and nails)		
Q-PLUS C	Q-SWITCHED and PHOTO-THERMAL	Nd:YAG 1064/532 nm
	Q-SWITCHED and PHOTO-THERMAL	RUBY 694 nm
Removal of almost all tattoo colors - Benign pigmented lesion removal - Lightening of unwanted hairs Skin rejuvenation - Dermatological foot conditions (skin and nails) - Permanent hair reduction*		
Q-PLUS R	Q-SWITCHED and PHOTO-THERMAL	RUBY 694 nm
Tattoo removal - Benign pigmented lesion removal - Permanent hair reduction*		
Q-PLUS STAR 1	Q-SWITCHED and PHOTO-THERMAL	Nd:YAG 1064/532 nm
	PULSED	Nd:YAG 1064/1320 nm (Optional)
Benign pigmented lesion removal - Tattoo removal - Lightening of unwanted hairs - Skin rejuvenation Permanent hair reduction* - Dermatological foot conditions (skin and nails) - Dermatological vascular lesions Scars treatment - Inflammatory acne		
Q-PLUS STAR 2	Q-SWITCHED and PHOTO-THERMAL	Nd:YAG 1064/532 nm
	PULSED	ALEXANDRITE 755 nm
Benign pigmented lesion removal - Tattoo removal - Permanent hair reduction* - Lightening of unwanted hairs Skin rejuvenation - Dermatological foot conditions (skin and nails) - Dermatological vascular lesions		
ULTRALIGHT	Q-SWITCHED and PHOTO-THERMAL	Nd:YAG 1064/532 nm
	PULSED	Nd:YAG 1064/532 nm
Benign pigmented lesion removal - Tattoo removal - Lightening of unwanted hairs - Skin rejuvenation Permanent hair reduction* - Dermatological foot conditions (skin and nails) - Dermatological vascular lesions Scars treatment - Inflammatory acne		

* Permanent hair reduction is defined as the long-term stable reduction in the number of hairs regrowing when measured at 6, 9, and 12 months after the completion of a treatment regimen.

ACCESSORIES

TWAIN CONNECTOR

Q-Plus EVO, through the special Twain universal connector, can be equipped with Twain 2940 and Twain IPL handpieces.

Nd:YAG 1320

Optional for Q-Plus Star 1. It is a Nd:YAG @ 1320 nm, very effective for non-ablative skin rejuvenation and for scars treatments.

TWAIN 2940

Twain 2940 is a laser handpiece that fits to the Twain universal connector present on the Quanta System laser platforms. It has been designed to perform ablation procedures, both fractional and homogeneous.

The Er:YAG laser @ 2940 nm is able, through the variation of pulse parameters, to remove the layers of skin with minimal thermal damage or produce a higher coagulation suitable for the stimulation of collagen production.

FRACTIONAL
skin resurfacing
traumatic and acne scars
epidermal dyschromia
sun and age spots

HOMOGENOUS
skin ablation
full skin resurfacing

TWAIN IPL

Q-Plus EVO can be equipped with Twain IPL handpieces. The contact skin cooling and the 6 range of wavelengths available, expand flexibility and versatility in the treatments.

permanent hair reduction
benign pigmented lesions
skin rejuvenation procedures
dermatological vascular treatments
active acne

Integrated Contact SKIN COOLER

The skin cooler is fully integrated into the system. In all treatment performed with pulsed lasers (Q-Plus Star 1, 2 and Ultralight) it ensures an effective thermal protection and increases the treatment comfort.

SKINCRYO

It is an adapter that integrates the optics of pulsed laser (Q-Plus Star 1, 2 and Ultralight) with Zimmer air cooling. This handpiece ensures the best pain reduction when treating large areas.

TECHNICAL SPECIFICATIONS

Laser	Q-Switched Nd:YAG	Q-Switched FD Nd:YAG	Q-Switched Ruby
Wavelength (nm)	1064	532	694
Pulse width	6ns in single pulse; 6ns + >150µs + 6ns in OP mode (double pulse); 300µs in PT mode (Photo-Thermal)	6ns in single pulse; 6ns + >150µs + 6ns in OP mode (double pulse)	30ns; 2 ms in PT mode (Photo-Thermal)

Quanta System products are manufactured according to the International standards and have been cleared by the most important International notified bodies. The Company is EN ISO 9001:2008 and EN ISO 13485:2012 certified. Quanta System S.p.A. was founded in 1985 and belongs to the E.I. En. Group (a public company listed in the Star segment of the Italian Stock Exchange) since January 2004. The company, divided into three business units (medical, scientific and industrial) is specialized in manufacturing of laser and opto-electronic devices.
